Recursive vs Iterative

| # OF NUMBERS	15	20	25	35	40	45	1250	2500	5000	10000
Recursive Fib Sequnce in seconds	0	0	0	0.29	3.25	36.18				
Iterative Fib Sequence in seconds	0	0	0	0	0	0	0.01	0.04	0.16	4.03

1. Recursive Fibonnaci Sequence follows a factorial graph and grows extremely fast....run time will be INCREDIBLY slow after n grows much higher than 40.

2. Iterative Fibonnaci Sequence follows an exponential graph and grows much 'slower' than its factorial partner.
Much faster but still gets slow after n gets into a range above 100k
